Fiberglass Reinforced Plastic (FRP)

Fiberglass Reinforced Plastic, or FRP, is reinforced side skirts for semi-truck trailers. They increase fuel proficiency and look amazing on each make and model. Our company specializes in making 1-piece curved and 3-piece straight FRP panels.

Our company believes in providing the best possible services and products for our clients, that's why we do FRP repair work anywhere in the United States. Our crews make regular trips for our customer's convenience and are always available for emergency repairs. If you would like to hire our services so you can see just why we're a premier repair company, then call our representative: THERMOFLO Equipment Co., 918-252-9333.
